

INTERNSHIP — COMPUTER SCIENCE / IT

Research & Development · Service & Support

LEVEL
Internship

LOCATION
Jalan Ampang, KL

DURATION
3–6 months

FIELD
Maritime Software

Start your software career in the maritime industry. Join BASS's Internship program under the Research & Development and Service & Support departments. Become part of the software development team building and supporting fleet management systems used on over 1500 vessels worldwide — and experience a new adventure.

YOUR TEAM — WHERE YOU COULD BE ASSIGNED —

01 · TECHNICAL SUPPORT

Test & enhance

- Vessel kit testing
- Project macro testing & product fitness verification
- Database verification
- Enhance internal systems in ASP, ASP.NET & C#
- Enhance internal reports using Crystal Reports

02 · SOFTWARE ENGINEER

Build with .NET

- Work with .NET development, particularly ASP.NET
- Build understanding of data dictionaries and database documentation

03 · QA (SOFTWARE TESTING)

Assure quality

- Smoke, UI & functionality testing on BASSnet suite modules
- Document test cases as requested by the Supervisor
- Databases used: MSSQL Server

04 · INFORMATION SECURITY

Protect & comply

- Support gap analysis & risk assessment
- Assist implementing ISMS controls & security policies
- Documentation for ISO 27001 compliance
- Participate in internal/external audits
- Prepare training & awareness materials

05 · IT SUPPORT

Keep systems running

- Diagnose & resolve IT components reported by internal users
- Manage IT readiness for employee onboarding
- Provide remote assistance across locations
- Monitor BASSnet performance, server logs & alerts

06 · PROJECT & SERVICE IMPL.

Support delivery

- Data verification & testing on customer register data
- Function testing on ERP modules (Procurement, HR & Payroll)
- Assist DCs with issue simulation & root cause finding
- Enhance reports via Crystal Reports / Dev Express
- Prepare test scripts & user guides

WHAT YOU BRING —

01

Education

Pursuing a Diploma or Bachelor's Degree in Computer Science, Information Technology, Data Science, Cybersecurity, or equivalent.

02

Stage

Last-semester candidates preferred.
Available for a 3–6 month internship.

03

Core skills

MS Excel and MSSQL Server required for Technical Support, Development, and QA tracks.

04

Preferred skills

ASP.NET is an advantage. Software Application track: strong Math, Finance, Calculation, and Calculus.

05

Language

Good command of English for documentation and team communication.

06

Location

Willing to work on-site at our Jalan Ampang office in Kuala Lumpur.

A GLOBAL TEAM —

CYPRUS

Commercial hub

HAMBURG

Product management

OSLO

Maritime expertise

KUALA LUMPUR

Development & innovation
