Enclosure – Page 1 of 1
BASSnet Neo

The product is an application software intended for the organization of the work flows on a ship with regard to planning of maintenance and surveys, to inventory/procurement of equipment and to management of crew works.

Components of the BASSnet Neo system are divided between server part and client part.

Server Part Components:	Client Part (WEB UI) components:
Microsoft Azure HTTP Server	BASSnet Neo Application
Azure SQL Database	PMS – Planned Maintenance System
Azure File Storage	Inventory – Procurement
Azure Fabric	Compliance
DATADOG	Cloud Services

All the necessary software packages should be installed and configured as prescribed in the system documentation.
